REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The prior art of record, Alsop et al teaches compositions comprising dextrans that have a bulking effect and are used to help flow of potentially toxic or allergic substances through the gut. The instant invention uses a composition wherein the thickening effect is minimized by allowing the viscosity to rise by not more than 10mPas for reducing the uptake of allergens and microorganisms. The method as instantly claimed, is not taught or fairly suggested by the prior art of record.

Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".

Any inquiry concerning this communication should be directed to James O. Wilson, Primary Examiner in Art Unit 1623 at 703-308-4624.
